

## Morpheus8 and MorpheusBody RF Microneedling

**WHAT IS RF MICRONEEDLING?** RF microneedling, or radiofrequency microneedling, is the ultimate treatment for collagen induction therapy and skin rejuvenation. This treatment combines two effective technologies that give your skin a boost in plumping, minimizes scars, and provides you with an overall even skin tone.

**HOW DOES RF MICRONEEDLING WORK?** The RF microneedling procedure utilizes an energy device that allows for the penetration of a single-use grid of needles through the skin. Then, radiofrequency energy targets the dermis. The full length of the needle is insulated and only the tip delivers the energy, preventing heat buildup at the top layer of the skin. This feature is so important for skin of color since this device does not injure the delicate melanocytes that are concentrated at the junction between the dermis and epidermis. Morpheus8 delivers the energy 1 to 4mm deep into the skin to promote collagen formation and skin tightening while MorpheusBody goes as deep as 8mm deep into the fat tissues using a stacking of energies at different depths for optimal tightening.

**DURING THE TREATMENT** The device is applied in a “stamping” motion to the treatment area. Multiple passes with a customized set of treatment parameters are used to optimize results. The procedure may include a topical numbing cream, injectibles anesthetic, ProNox or oral medications for added comfort. The procedure takes about one hour depending on the size of the treatment area. Treatment may be combined with Platelet Rich Plasma (PRP), Accutite RFL or CO<sub>2</sub> to increase effectiveness.

**BENEFITS OF THE TREATMENT** This treatment has been shown to have overall rejuvenating effects on the skin, such as improving skin texture, fine lines and wrinkles; increasing volume via the increased production of collagen and elastin; and by diminishing and improving the appearance of scars. The skin tightening is seen over time as the skin repairs itself from the inside out. Other benefits include minimal downtime, minimal risk, short recovery time and natural-looking results.

**SCARS AND ACNE SCARS:** By nature scarring is individual, therefore we often customize every treatment, utilizing a combination of RF microneedling and/or various lasers and TCA CROSS to address different forms of scarring. A series of treatments may include a combination of modalities as the scars heal and the skin is regenerated.

**WHAT AREAS CAN BE TREATED?** Morpheus8 can be used on any areas that can benefit from sub-dermal renewal. Areas of the face and body that exhibit wrinkles, discoloration or acne scarring are suitable for treatment. The most commonly treated areas include the lower face and neck, chest, loose skin of the abdomen, above the knees and elbows or any areas with loose skin.

**HOW MANY TREATMENTS ARE RECOMMENDED?** Depending on the condition that is being treated, multiple sessions may be required with an interval of 4 to 12 weeks between treatments. A series of 3 sessions is most commonly recommended to achieve desired results after which time maintenance treatments are recommended to maintain results as the skin ages.

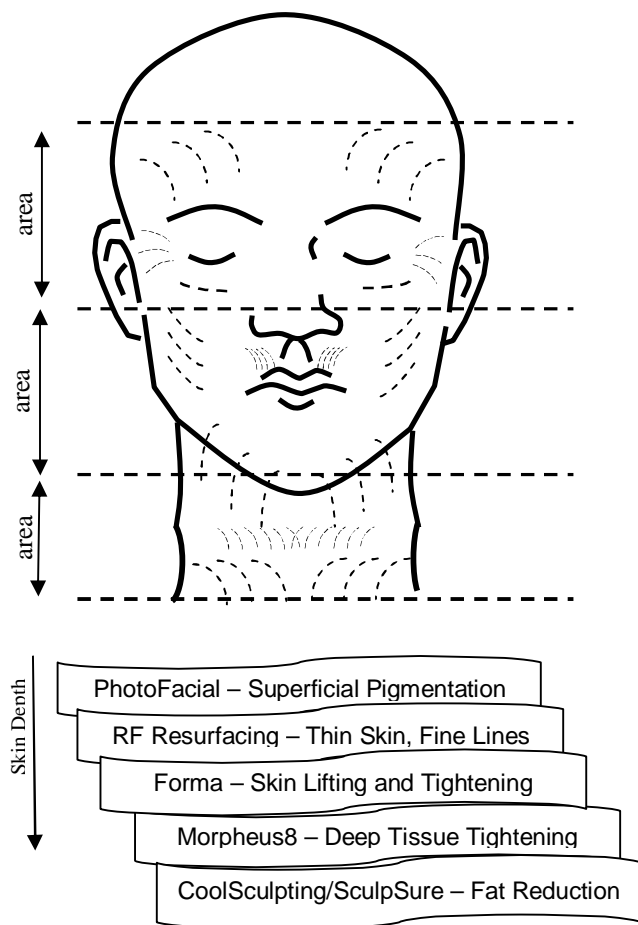

**PREPARE FOR YOUR TREATMENT** Discontinue use of retinoids one week prior to the treatment. No sun exposure two weeks before and after treatment. No fillers in the treatment area 4 weeks before treatment.

**AFTER YOUR TREATMENT** Some redness and sunburn effect may be present; freckles may appear darker for up to 10 days. Make-up may not be used for 3 days after treatment as the columns created by microneedling may remain open for up to 48 hours. Skin care serums with peptides and hyaluronic acid may be used to increase the effectiveness of the treatment (Hylapeptide \$50). Only certain sunscreens may be used several days after treatment, please check with us before using sunscreen.

**FORMA MAINTENANCE** Radiofrequency without Microneedling is used for maintenance of results to keep the skin active and continue producing collagen and elastin. Popular with celebrities, Forma is a completely non invasive treatment with no downtime or numbing. Forma feels like a warm massage and can be performed weekly for rejuvenation or intermittently for maintenance. Skin tightening, pore reduction and skin lifting can be achieved with a 6 weekly treatment rejuvenation package.

**FAT CELL REDUCTION** Excess fat in the treatment area can be addressed with adding CoolSculpting (fat freezing) or SculpSure (laser fat reduction). Fat reduction treatment is best performed before the first Morpheus8 treatment. Treatment regimens have been developed for optimal results, combining fat reduction, skin tightening and maintenance.

**SKINCARE MAINTENANCE** such as antioxidants, growth factors, retinols and sun protection help maintain results and prevent further skin damage. Schedule a post treatment consultation with our skin care consultant to design your individualized skin care regimen or start with **RUBINSTEIN|MD** Anti Aging Regimen available at [www.LAskInMD.com/shop](http://www.LAskInMD.com/shop)

Morpheus8	Number of Treatments 4-6 weeks apart			when added to Accutite		
	ONE	TWO	THREE	ONE	TWO	THREE
<b>One Area</b> <i>approximately 3x8 inches (i.e. eyes, chin, mouth, knees, elbows, acne scars, stretch marks)</i>	1,100	2,100	2,950	600	1,000	1,850
